

# RISK REDUCTION FOR PROPERTY MANAGERS

June 18, 2020  
1 PM-4PM

## RISK REDUCTION FOR PROPERTY MANAGERS

**CE: 3 Legal Issues**  
**Instructor: Steve Schultz**

This class is designed for the professional property manager. The class focuses on using single family homes as the property type, but much of the material could be applied to multi-family or commercial properties as well. The class is designed to give students a tool they can immediately use to identify and reduce the risk in their property management business. The course will introduce the risk reduction theory and then how to apply it to several categories: property owners, tenants, government legislation, technology and vendors/contractors.

Steve graduated from New Mexico State University with a bachelor's degree in Mechanical Engineering. After working for Shell Oil Company and the American Institute of Aeronautics and Astronautics, he decided he wanted to take on the challenge of building a company from scratch. He began by building his own portfolio of residential rental properties. As he built his rental portfolio, he also wanted to create a property management company that would maximize the interests of the property owner

### **CERTIFIED RESIDENTIAL PROPERTY MANAGER:**

AAR's certification program is dedicated to property management and offers classes that you can use for your real estate license renewal. This program was designed to hone your knowledge and skills in topics that relate to your day to day business as a property manager.
