

Introducing the New and Improved SureClose Print Driver

Uploading your documents into SureClose has never been easier using the new search features, and .pdf conversion options in the new and improved SureClose Print Driver!

What is the SureClose Print Driver?

SureClose Print Driver is a utility program used to upload documents directly to your SureClose Inbox, or to a specified placeholder on a file.

What's New in this Release?

- The ability to search, upload documents and create folders / placeholders on a Generic file.
- The Create New File button can be displayed by selecting option from the Tools menu bar.
- Fixed the templates not displaying for creating new Listing file.
- Fixed the file status not displaying when creating a Closing file.

Using this utility has never been so easy!
You can search for an existing file, search for your most recently used file, create a new file, view folders, select placeholders, or create new placeholders all without ever leaving the SureClose Print Driver!

Basic Tab

Use the Basic tab to upload documents to your SureClose Inbox, or to a specific document placeholder on a file. If uploading to a specific document placeholder on a file, then you must type the file number, import code, and permission key.

Advanced Tab

Use the Advanced tab to upload documents to a placeholder by searching for an existing file, or your most recently used file by clicking the **Recent File** button. Selecting a file displays a list of available folders and placeholders. If needed, click the **Create Placeholder** button to create new placeholders, or select an existing placeholder to upload a document to.

If the file does not already exist, click the **Create New File** button to create the file in SureClose. It's that easy!

Address	MLS #	Escrow #	File #	Type	Status
